1. **Qualification, Service, and Use of Crewmembers and Aircraft Dispatchers** Red

Popular Title: Part 121, Subparts N and O

RIN 2120-AJ00

Stage: SNPRM

Previous Stage: NPRM: Publication Date 01/12/2009;End of Comment Period 05/12/2009;Extension of Comment Period 04/20/2009;End of Extended of Comment Period 08/10/2009.

Abstract: This rulemaking would amend the regulations for crewmember and dispatcher training programs in domestic, flag, and supplemental operations. The rulemaking would

enhance traditional training programs by requiring the use of flight simulation training devices for flight crewmembers and including additional training requirements in areas that are critical to safety. The rulemaking would also reorganize and revise the qualification and training requirements. The changes are intended to contribute significantly to reducing aviation accidents.

2.	Pilot-in-Command Proficiency Check and Other Changes to the Pilot and Pilot School Certification Rules	Red
----	---	-----

Popular Title: PIC Proficiency

RIN 2120-AJ18

Stage: Final Rule

Previous Stage: NPRM: Publication Date 08/31/2009; End of Comment Period 11/30/2009

Abstract: This rulemaking would require proficiency checks for pilots in command (PICs) of single-piloted turbojet powered airplanes, allow pilot schools to use Internet-based training without requiring schools to have a physical ground training facility, allow pilot schools and provisional pilot schools to apply for a combined private pilot certification and instrument rating course, and revise the definition of "complex airplane." FAA believes these actions are necessary to respond to changes in the aviation industry and to avoid imposing unnecessary regulatory burdens. The intended effect of this rulemaking would be to ensure flight crewmembers have the training and qualifications necessary to operate aircraft safely.

Abstract: This rulemaking would address certification and operational issues surrounding the introduction of turbofan powered airplanes. This action is necessary to standardize certification requirements and consolidate these requirements into one location. The intent is to ensure the same standards apply to all light aircraft.

Effects:

None

Prompting action: None

Abstract: This rulemaking would amend the airworthiness standards applicable to certain transport category airplanes certificated for flight in icing conditions and the icing airworthiness standards applicable to certain aircraft engines. The rulemaking would improve safety by addressing supercooled large drop icing conditions for transport category airplanes most affected by supercooled large drop icing conditions, mixed phase and ice crystal conditions for all transport category airplanes, and supercooled large drop, mixed phase, and ice crystal icing conditions for all turbine engines. This rulemaking is the result of information gathered from a review of icing accidents and incidents.

5.	Restrictions on Operators Employing Former Flight Standards Service Aviation Safety Inspectors	Yellow
----	---	--------

Popular Title: Post Employment Restrictions**RIN 2120-AJ36****Stage:** Final Rule

Previous Stage: NPRM: Publication Date 11/20/2009; End of Comment Period 2/18/2010.

Abstract: This rulemaking would prohibit a certificate holder from employing or contracting with a former Aviation Safety Inspector (ASI) or other person with certificate holder oversight responsibilities to act as an agent or to represent that certificate holder in any matter before the FAA. This restriction would apply if the person, in the proceeding two year period, has (a) served as, or was responsible for oversight of, a Flight Standards Service ASI; and (b) had the responsibility to inspect, or oversee the inspection of, the operations of the certificate holder. The rulemaking would enhance the FAA's ability to properly perform its safety mission and to ensure that every passenger can have complete confidence in the integrity of the programs and operations administered by the FAA.

6. **Airport Safety Management System** Red**Popular Title:** Airport SMS**RIN 2120-AJ38****Stage:** NPRM**Previous Stage:**None

Abstract: This rulemaking would require airport operators to institute a safety management system at their airports. This action is necessary to improve safety through conformance with best practices in risk management and promote international harmonization with ICAO standards. The rule is intended to facilitate integration of formal risk management processes within the airport's day-to-day operations.

Popular Title: Part 121 - Ice Protection

RIN 2120-AJ43

Stage: Final Rule

Previous Stage: NPRM: Publication Date 11/23/2009; End of Comment Period 02/22/2010

Abstract: This rulemaking would amend the regulations applicable to operators of certain airplanes used in air carrier service and certificated for flight in icing conditions. The standards would require either the installation of ice detection equipment or changes to the Airplane Flight Manual to ensure timely activation of the airframe ice protection system. This regulation is the result of information gathered from a review of icing accidents and incidents, and it is intended to improve the level of safety when airplanes are operated in icing conditions.

RIN 2120-AJ53

Stage: Final Rule

Previous Stage: NPRM: Publication Date 10/12/2010; End of Comment Period 01/01/2011.

Abstract: This rulemaking would change equipment and operating requirements for commercial helicopter operations, including many specifically for helicopter air ambulance operations. This rulemaking is necessary to increase crew, passenger, and patient safety. The intended effect is to implement National Transportation Safety Board, Aviation Rulemaking Committee, and internal FAA recommendations.

Effects:

10. Flight and Duty Time Limitations and Rest Requirements**Green****Popular Title:** Flight/Duty/Rest Requirements**RIN 2120-AJ58****Stage:** Final Rule**Previous Stage:** NPRM: Publication Date 09/14/2010;End of Comment Period 11/15/2010.

Abstract: This rulemaking would amend existing flight, duty, and rest regulations applicable to certificate holders and their flightcrew members operating under 14 CFR part 121. The new requirements would eliminate the current distinctions between domestic, flag, and supplemental operations. Also, the rulemaking would provide different requirements based on the time of day, whether an individual is acclimated to a new time zone, and the likelihood of being able to sleep under different circumstances. This rulemaking is necessary to improve aviation safety by providing applicable persons with the opportunity for sufficient rest.

11. Operation and Certification of Small Unmanned Aircraft Systems (sUAS)**Red****Popular Title:** Small Unmanned Aircraft**RIN 2120-AJ60****Stage:** NPRM**Previous Stage:**None

Abstract: This rulemaking would enable small unmanned aircraft to safely operate in limited portions of the national airspace system (NAS). This action is necessary because it addresses the novel legal or policy issues about the minimum safety parameters for operating recreational remote control model and toy aircraft in the NAS. The intended effect of this action is to develop requirements and standards to ensure that risks are adequately mitigated, such that safety is maintained for the entire aviation community.

Pilot Certification and Qualification Requirements (formerly First Officer) Red

13. **Qualification Requirements) (HR 5900)**

Popular Title: Pilot Certification and Qualification Requirements

RIN 2120-AJ67

Stage: NPRM

Previous Stage: ANPRM: Publication Date 02/08/2010; End of Comment Period 04/09/2010

Abstract: This rulemaking would amend the eligibility and qualification requirements for pilots engaged in part 121 air carrier operations. Additionally, it would modify the requirements for an airline transport pilot certificate. These actions are necessary because recent airline accidents and incidents have brought considerable attention to the experience level and training of air carrier flight crews.

14. **Overflight Fees** **Green**

Popular Title: Overflight Fees

RIN 2120-AJ68

Stage: Final Rule

Previous Stage: NPRM: Publication Date 09/28/2010;End of Comment Period 12/27/2010.

Abstract: This rulemaking would adjust existing overflight fees by using updated FAA cost accounting data and air traffic activity data. This action is necessary because operational costs for providing air traffic control and related services for Overflights have increased steadily since they were established in 2001. This rulemaking has been downgraded to non-significant for the final stage and will not be on next's month report.

15. **Prohibition Against Certain Flights Within the Territory and Airspace of Afghanistan** Red

Popular Title: Afghanistan SFAR

RIN 2120-AJ69

Stage: Final Rule

Previous Stage: NPRM: Publication Date 05/26/2010;End of Comment Period 06/10/2010.

Abstract: This rulemaking would prohibit flight operations below flight level (FL) 160 within the territory and airspace of Afghanistan by all: U.S. air carriers; U.S. commercial operators; persons exercising the privileges of a U.S. airman certificate, except if the flight is on behalf of a foreign air carrier; and operators of U.S.-registered aircraft, except when such operators are foreign air carriers. The FAA finds this action necessary to prevent a potential hazard to persons and aircraft in engaged in such flight operations.

16. **Requirement for Wildlife Assessments at Certificated Airports** Red

Popular Title: Wildlife Hazard Assessment (WHA)

RIN 2120-AJ71

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would require a Wildlife Hazard Assessment (scientific evaluation of wildlife populations and their attractants) for certificated airports. This rulemaking would also require periodic completion of a wildlife hazard assessment, or continuous wildlife monitoring as an alternative to the assessment, and clarify requirements for those conducting an assessment. This rulemaking is intended to decrease direct hazards (animals striking aircraft) and indirect hazards (animal burrowing and nesting in or near aircraft or aircraft operations areas).

17. **Part 121 Exiting Icing Conditions** Red

Popular Title: Exiting Icing Conditions

RIN 2120-AJ74

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would require operators of certain airplanes used in air carrier service and certificated for flight in icing conditions to: 1. enable the flightcrew to determine when the airplane is in large drop icing conditions, and 2. require follow-on flightcrew action in these conditions for certain airplanes with reversible flight controls for the pitch and/or roll axis. This rulemaking is the result of information gathered from a review of icing accidents and incidents, and it is intended to improve the level of safety when airplanes are operated in icing conditions. This rulemaking will be replaced by RIN 2120-AJ95.

19. **Safety Management Systems for Part 121 Certificate Holders** Red

Popular Title: SMS for Part 121

RIN 2120-AJ86

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would require all part 121 air carriers to implement a safety

management system (SMS). Congress passed Public Law 111-216 instructing FAA to conduct a rulemaking to require all part 121 air carriers to implement an SMS. The proposed rule must include the following safety management elements: requirements based on risk management, quality management techniques to develop safety assurance, use of interrelated systems to measure effectiveness of safety measures, and promotion of an organization-wide safety culture. Congress further required that the FAA consider at a minimum each of the following as part of the SMS rulemaking: (1) An Aviation Safety Action Program (ASAP), (2) A Flight Operational Quality Assurance Program (FOQA), (3) A Line Operations Safety Audit, and (4) An Advance Qualification Program.

21. **New York Congestion Management Rule for LaGuardia Airport, John F. Kennedy International Airport, and Newark Liberty International Airpor** Yellow

Popular Title: NY Congestion Management

RIN 2120-AJ89

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would replace the current temporary orders limiting scheduled operations at LaGuardia Airport, John F. Kennedy International Airport, and Newark Liberty International Airport with a more permanent rule to address the issues of congestion and delay at the New York area's three major commercial airports, while also promoting fair access and competition. The rulemaking would help ensure that congestion and delays are managed by limiting scheduled and unscheduled operations. The rulemaking would also establish a secondary market for U.S. and foreign air carriers to buy, sell, trade, and lease slots amongst each other at each of the three airports. This would allow carriers serving or seeking to serve the New York area airports to exchange slots as their business models and strategic goals require.

23. **Part 121 Exiting Icing** **Red**

Popular Title: Part 121 Exiting Icing

RIN 2120-AJ95

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would establish the standards for when flightcrews need to take action to exit icing conditions. If adopted, this rulemaking would apply to aircraft with a maximum takeoff weight of less than 60,000 pounds. This rulemaking is based on recommendations from an Aviation Rulemaking Advisory Committee working group after reviewing certain accidents and incidents. The intended affect of this action is to avoid similar accidents and incidents in the future. This rulemaking replaces RIN 2120-AJ74, for which an NPRM had originally been scheduled for 11/02/2011. This rulemaking has expanded the scope of RIN 2120-AJ74 to include requirements for design approval holders.

31.	Application by Certain Mexico-Domiciled Motor Carriers to Operate Beyond U.S. Municipalities and Commercial Zones on the U.S.-Mexico Border	Red
-----	--	-----

Popular Title: Mexico-Domiciled Motor Carriers

RIN 2126-AA34

Stage: Undetermined

Previous Stage: NPRM: Publication Date 05/03/2001; End of Comment Period 07/02/2001.
Interim Final Rule: Publication Date 03/19/2002; End of Comment Period 04/18/2002.

Abstract: This rulemaking would change FMCSA regulations to govern applications by Mexican carriers to operate beyond municipalities and commercial zones at the United State-Mexico border. It would also revise the application form, OP-1MX, to be filed by these Mexican motor carriers. The revised form would require additional information about the applicant's business and operating practices to allow the FMCSA to determine if the applicant can meet the safety standards established for operating in interstate commerce in the United States. Carriers that had previously submitted an application would have to submit the updated form. These changes are needed to implement part of the North American Free Trade Agreement (NAFTA). On January 16, 2003, the Ninth Circuit Court remanded this rule, along with two other NAFTA-related rules, to the agency, requiring a full environmental impact statement and an analysis required by the Clean Air Act. On June 7, 2004, the Supreme Court reversed the Ninth Circuit and remanded the case, holding that FMCSA is not required to prepare the environmental documents as ruled by the Ninth Circuit. FMCSA originally planned to publish a final rule by November 20, 2003. FMCSA will determine the next steps to be taken after enactment of any pending legislation authorizing cross border trucking.

Interim Final Rule: Publication Date 03/19/2002; End of Comment Period 04/18/2002.

Abstract: This rule would implement a safety monitoring system and compliance initiative designed to evaluate the continuing safety fitness of all Mexico-domiciled carriers within 18 months after receiving a provisional Certificate of Registration or provisional authority to operate in the United States. It also would establish suspension and revocation procedures for provisional Certificates of Registration and operating authority, and incorporate criteria to be used by FMCSA in evaluating whether Mexico-domiciled carriers exercise basic safety management controls. The interim rule included requirements that were not proposed in the NPRM but which are necessary to comply with the FY-2002 DOT Appropriations Act. On January 16, 2003, the Ninth Circuit Court of Appeals remanded this rule, along with two other NAFTA-related rules, to the agency, requiring a full environmental impact statement and an analysis required by the Clean Air Act. On June 7, 2004, the Supreme Court reversed the Ninth Circuit and remanded the case, holding that FMCSA is not required to prepare the environmental documents. FMCSA originally planned to publish a final rule by November 28, 2003. FMCSA will determine the next steps to be taken after enactment of any pending legislation authorizing cross border trucking.

Previous Stage: Interim Final Rule: Publication Date 05/05/2003; End of Comment Period 07/07/2003. IFR Delay of Compliance Date: Publication Date 11/07/2003; End of Comment Period 01/06/2004. IFR Delay of Compliance Date: Publication Date 08/19/2004; Interim Final Rule/3: Publication Date 08/19/2004.

Abstract: This rulemaking would prohibit States from issuing, renewing, transferring or upgrading a commercial driver's license (CDL) with a hazardous materials endorsement, unless the Transportation Security Administration (TSA) has first conducted a background check on the applicant and determined the applicant does not pose a security risk warranting denial of the hazardous materials endorsement. FMCSA and TSA simultaneously published interim final rules. FMCSA has published another IFR corresponding to TSA's extension

of compliance date. Since this rulemaking conforms to TSA's rulemaking, the rulemaking is dependent upon TSA action. This action is considered significant because of substantial public and congressional interest, and national security.

Popular Title: National Registry

RIN 2126-AA97

Stage: Final Rule

Previous Stage: NPRM: Publication Date 12/01/08; End of Comment Period 01/30/09

Abstract: This rulemaking would establish training, testing and certification standards for medical examiners responsible for certifying that interstate commercial motor vehicle drivers meet established physical qualifications standards; provide a database (or National Registry) of medical examiners that meet the prescribed standards for use by motor carriers, drivers, and Federal and State enforcement personnel in determining whether a medical examiner is qualified to conduct examinations of interstate truck and bus drivers; and require medical examiners to transmit electronically to FMCSA the name of the driver and a numerical identifier for each driver that is examined. The rulemaking would also establish the process by which medical examiners that fail to meet or maintain the minimum standards would be removed from the National Registry. This action is in response to section 4116 of Safe, Accountable, Flexible, Efficient, Transportation Equity Act: A Legacy for Users (SAFETEA-LU).

39. **Carrier Safety Fitness Determination** Red

Popular Title: Carrier Safety Fitness Determination

RIN 2126-AB11

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would revise 49 CFR Part 385, Safety Fitness Procedures, in accordance with the Agency's major new initiative, Comprehensive Safety Analysis (CSA) 2010. CSA 2010 is a new operational model FMCSA plans to implement that is designed to help the Agency carry out its compliance and enforcement programs more efficiently and effectively. Currently, the safety fitness rating of a motor carrier is determined based on the results of a very labor intensive compliance review conducted at the carrier's place of business. Aside from roadside inspections and new audits, the compliance review is the Agency's primary intervention. Under CSA 2010, FMCSA would propose to implement a broader array of progressive interventions, some of which allow FMCSA to make contact with more carriers. Through this rulemaking FMCSA would establish safety fitness determinations based on safety data consisting of crashes, inspections, and violation history rather than the standard compliance review. This will enable the Agency to assess the safety performance of a greater segment of the motor carrier industry with the goal of further reducing large truck and bus crashes and fatalities.

41.	Commercial Driver's License Drug and Alcohol Clearinghouse	Red
-----	---	-----

Popular Title: CDL Drug and Alcohol Database

RIN 2126-AB18

Stage: NPRM

Previous Stage: None

Abstract: This rulemaking would create a central database for verified positive controlled substances and alcohol test results for commercial driver's license (CDL) holders and refusals by such drivers to submit to testing. This rulemaking would require employers of CDL holders and service agents to report positive test results and refusals to test into the database. Prospective employers, acting on an application for a CDL driver position with the applicant's written consent to access the database, would query the database to determine if any specific information about the driver applicant is in the database before allowing the applicant to be hired and to drive CMVs. This rulemaking is intended to increase highway safety by ensuring CDL holders, who have tested positive or have refused to submit to testing, have completed the U.S. DOT's return-to-duty process before driving CMVs in interstate or intrastate commerce. It is also intended to ensure that employers are meeting their drug and alcohol testing responsibilities.

42.	Electronic On-Board Recorders and Hours of Service Supporting Documents	Red
-----	--	-----

Popular Title: EOBR and HOS supporting documents

RIN 2126-AB20

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking will consider revisions to RIN 2126-AA89 (Electronic On-Board Recorders for Hours of Service Drivers) to expand the number of motor carriers required to install and operate Electronic On-Board Recorders (EOBRs). FMCSA is consolidating this follow-up to the EOBR rule with the Hours Of Service Of Drivers: Supporting Documents rulemaking for development of a single NPRM in RIN 2126-AB20. In addressing Hours of

Service Supporting Documents requirements in this new rulemaking, FMCSA will consider reducing or eliminating current paperwork burdens associated with supporting documents in favor of expanded EOBR use. On January 15, 2010, the American Trucking Associations (ATA) filed a Petition for a Writ of Mandamus in the United States Court of Appeals for the District of Columbia Circuit (D.C. Cir. No. 10-1009). ATA petitioned the court to direct FMCSA to issue an NPRM on supporting documents in conformance with the requirements set forth in section 113 of the HMTAA within 60 days after the issuance of the writ and a final rule no later than 6 months after the issuance of the NPRM. The court granted the petition for writ of mandamus on September 30, 2010, ordering FMCSA to issue an NPRM on the supporting document regulations by December 30, 2010. At the request of the agency, the DC Circuit extended the deadline to January 31, 2011.

Popular Title: Roadway Worker Protection; Adjacent-Track On-Track

RIN 2130-AB96

Stage: Final Rule

Previous Stage: NPRM: Publication Date 11/25/2009; End of Comment Period 1/25/2010.

Abstract: This rulemaking would simplify the determination regarding whether or not adjacent track protection is required for roadway work groups engaged in large-scale maintenance or construction, pursuant to 49 CFR Part 214. The recent increase in roadway worker fatalities that have occurred on adjacent track has caused some concern at FRA and throughout the industry, even prompting the filing of a petition for emergency order. FRA issued a notice of safety advisory to address the issue in May of 2004; however, it appears that the effects were not long-lasting. This rulemaking is based on the consensus language developed through the Roadway Worker Protection (RWP) Working Group of FRAA's Railroad Safety Advisory Committee (RSAC).

RIN 2130-AC09

Stage: Final Rule

Previous Stage: NPRM: Publication Date 5/10/2010; End of Comment Period 7/9/2010.

Abstract: This rulemaking would amend the Track Safety Standards and Passenger Equipment Safety Standards for high-speed train operations and train operations at high cant deficiencies to promote the safe interaction of rail vehicles with the track over which they operate. It would revise both the safety limits for these operations and the process to qualify them. It accounts for a range of vehicle types that are currently used and may likely be used on future high-speed or high cant deficiency rail operations, and would provide safety assurance for train operations in all classes of track. It is based on the results of simulation studies designed to identify track geometry irregularities associated with unsafe wheel forces and acceleration, thorough reviews of vehicle qualification and revenue service test data, and consideration of international practices.

56.	Amendments Expanding the Drug Panel for FRA Post-Accident Toxicological Testing	Green
-----	--	-------

Popular Title: Drug Panel Post-Accident Toxicological Testing

RIN 2130-AC24

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would expand the drug testing panel for FRA's post-accident toxicological testing (PATT) program, which investigates the role of alcohol and drug use in serious train accidents. This rulemaking would also amend the requirements regarding the analysis of PATT results in 49 C.F.R. Â§ 219.211 to reflect that some of the drugs in the expanded panel are prescription and over-the-counter drugs that are not controlled substances. FRA has tested for the same basic panel of drugs since the beginning of PATT in 1985. Currently, FRA tests blood and urine specimens for eight drug classifications: alcohol, marijuana, cocaine, the opiates, the amphetamines, phencyclidine (PCP), the barbiturates, and the benzodiazepines. FRA would expand the PATT panel to include synthetic opiates, sedating antihistamines, MDMA and one of its analogues, and additional benzodiazepines. This rulemaking does not make any substantive changes to the prohibitions on the abuse of controlled substances and prescription drugs found in 49 C.F.R. Â§Â§ 219.102 and 219.103.

57. **Medical Standards for Certified Locomotive Engineers and Conductors** Yellow

Popular Title: Medical Standards for Engineers and Conductors

RIN 2130-AC25

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would create a medical standards program for certified locomotive engineers and conductors to reduce the risk of railroad accidents due to medical conditions that pose a risk of sudden incapacitation. The rulemaking would revise the existing hearing and vision requirements for locomotive engineers in 49 CFR part 240 and apply these requirements to train conductors in 49 CFR part 242 (See Sec. 402 of the Rail Safety Improvement Act of 2008). It would also contain medical standards for the assessment of certain conditions that pose a risk of sudden incapacitation (specifically, stroke, syncope, seizures, cardiovascular disease, insulin-dependent diabetes, and obstructive sleep apnea). These standards, which are being developed by a physicians task force, would be applied by railroad physicians in required triennial and discretionary interim medical assessments of engineers and conductors.

Previous Stage: ANPRM: Publication Date 03/04/09; End of Comment Period 05/04/09.

NPRM: Publication Date 12/07/2010; End of Comment Period 02/07/2011. NPRM Re-opened Comment Period: Publication Date 03/02/2011; End of Re-opened Comment Period 04/18/2011.

Abstract: This rulemaking would amend Federal Motor Vehicle Standard No. 111; Rearview Mirrors, to reflect requirements contained in the Cameron Gulbransen Kids Transportation Safety Act of 2007. The Act requires that NHTSA expand the required field of view to enable the driver of a motor vehicle to detect areas behind the motor vehicle to reduce death and injury resulting from backing incidents, particularly incidents involving small children and disabled persons. According to the Act, such a standard may be met by the provision of additional mirrors, sensors, cameras, or other technology to expand the driver's field of view.

RIN 2127-AK56

Stage: Final Rule

Previous Stage: NPRM: Publication Date 08/18/2010; End Of Comment Period 10/1/2010.

Abstract: This rulemaking would require the installation of lap/shoulder belts in newly-manufactured motorcoaches. Specifically, this rulemaking would establish a new definition for motorcoaches in 49 CFR Part 571.3. It would also amend Federal Motor Vehicle Safety Standard No. 208, "Occupant crash protection," to require the installation of lap/shoulder belts at all driver and passenger seating positions. It would also require the installation of lap/shoulder belts at driver seating positions of large school buses in FMVSS No. 208. This rulemaking responds, in part, to recommendations made by the National Transportation Safety Board for improving bus safety.

66.	Commercial Medium- and Heavy-Duty On-Highway Vehicles and Work Truck Fuel Efficiency Standards	Green
-----	---	-------

Popular Title: Medium- and Heavy-Duty Truck Fuel Efficiency

RIN 2127-AK74

Stage: Final Rule

Previous Stage: NPRM: Publication Date 11/30/2010; End of Comment Period 1/31/2011.

Abstract: This rulemaking would respond to requirements of the Energy Policy and Conservation Act, as amended by the Energy Independence and Security Act of 2007. The statute requires that rulemaking begin with a report by the National Academy of Sciences evaluating medium-duty and heavy-duty truck fuel economy standards. The National Academy provided Congress and NHTSA with this report on March 18, 2010. EISA then requires that NHTSA complete a study that examines the fuel efficiency of commercial medium- and heavy-duty on-highway vehicles and work trucks and determines the appropriate test procedures and methodologies for measuring the fuel efficiency of such vehicles, the appropriate metric for measuring the fuel efficiency of such vehicles, the range of factors that affect the fuel efficiency of these vehicles, and other factors that could impact a program to improve the fuel efficiency of these vehicles. The NHTSA study was issued October 25, 2010. Once that study is completed, NHTSA has 24 months to complete a final rule establishing a fuel efficiency program for these vehicles. The law provides that the new standards must provide at least 4 full model years of regulatory leadtime and 3 full model years of regulatory stability (i.e., the standards must remain in effect for 3 years before they may be amended). On May 21, 2010, President Obama issued a memorandum directing NHTSA and EPA conduct a joint rulemaking (NHTSA regulating fuel efficiency and EPA

regulating greenhouse gas emissions), and to issue a final rule by July 30, 2011.

Popular Title: Alternative Fuel Badges, Labels and Consumer Info

RIN 2127-AK75

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would respond to requirements of the Energy Independence and Security Act of 2007 (EISA), Title 1, Subtitle A, Section 105, as it amends 49 USC Â§ 32908, to implement Consumer Information and Consumer Education programs related to fuel economy, GHG, other emissions, and alternative fuels. EISA directs the Secretary of Transportation to label vehicles with a permanent and prominent display that an automobile is capable of operating on alternative fuels, and to include in the owner's manual for vehicles capable of operating on alternative fuels information that describes that capability and the benefits of using alternative fuels, including the renewable nature and environmental benefits of using alternative fuels. Additionally, EISA requires a label to be attached to the fuel compartment of vehicles capable of operating on alternative fuels, with the form of alternative fuel stated on the label. EISA, signed into Law on December 19, 2007, requires that the Secretary issue a final rule not later than 42 months after the date of the enactment.

69.	Passenger Car and Light Truck Corporate Average Fuel Economy Standards MYs 2017 and Beyond	Green
-----	---	-------

Popular Title: CAFE 2017 and Beyond

RIN 2127-AK79

Stage: NPRM

Previous Stage: Notice of Intent: Published 10/13/2010. Supplemental Notice of Intent: Publication Date 12/08/2010.

Abstract: This rulemaking would establish Corporate Average Fuel Economy (CAFE) standards for light trucks and passenger cars for model years 2017 and beyond. This rulemaking would respond to requirements of the Energy Policy and Conservation Act, as amended by the Energy Independence and Security Act of 2007. The statute requires that CAFE standards be prescribed separately for passenger automobiles and non-passenger automobiles to achieve a combined fleet fuel economy of at least 35 mpg by model year 2020. For model years 2021 and beyond, the statute requires that the average fuel economy required to be attained by each fleet of passenger and non-passenger automobiles be the maximum feasible for each model year. The law requires the standards be set at least 18 months prior to the start of the model year. On May 21, 2010, President Obama issued a memorandum directing NHTSA and EPA to conduct a joint rulemaking (NHTSA regulating fuel economy and EPA regulating greenhouse gas emissions), and to issue a Notice of Intent to Issue a Proposed Rule (NOI) by September 30, 2010.

70. **Mandatory Part 563 Event Data Recorder Requirements**

Green

Popular Title: EDRs Mandate**RIN 2127-AK86****Stage:** NPRM**Previous Stage:**None

Abstract: This rulemaking would establish a new Federal motor vehicle safety standard to mandate the installation of Event Data Recorders (EDR) in light vehicles. The standard would incorporate the current 49 CFR Part 563, which established the current reporting requirement of voluntarily installed EDRs in light vehicles. Part 563 presently requires vehicle manufacturers who are voluntarily installing EDRs to be in compliance with the regulation by September 1, 2012. This rulemaking would not affect the 2012 compliance date for voluntarily-installed EDRs. Furthermore, this rulemaking would not modify any of the Part 563 data elements, data capture and format requirements, data retrieval specifications, or data survivability and crash test requirements. Moreover, this rulemaking to mandate EDRs across the entire light vehicle fleet could contribute to advancements in vehicle designs, and advanced restraint and other safety countermeasures. The estimated total incremental costs associated with this rulemaking would be \$24.4 million (2009 dollars), which is measured from a baseline of 91.6 percent EDR installation to 100 percent installation, assuming the sale of 15.5 million light vehicles per year.

National Highway Traffic Safety Administration

71. **Upgrade of Event Data Recorder Requirements**

Green

Popular Title: EDRs Upgrade**RIN 2127-AK87****Stage:** ANPRM**Previous Stage:**None

Abstract: This rulemaking would expand the utility of the amount and type of data Event Data Recorders (EDRs) capture in light vehicles in the event of a crash. The rulemaking would consider requiring some of the optional data elements specified in 49 CFR Part 563. Part 563 established the current reporting requirement of voluntarily installed EDRs in light

vehicles. In addition, this rulemaking would make revisions to the optional data elements to account for the latest advances in vehicle safety. Part 563 presently requires vehicle manufacturers who are voluntarily installing EDRs to be in compliance with the regulation by September 1, 2012. In a separate rulemaking (2127-AK86 Mandatory Part 563 Event Data Recorder Requirements), the agency would propose requiring that all light vehicles comply with the requirements specified in current 49 CFR 563. This rulemaking would seek additional information from the public and expand upon that initiative. Moreover, this rulemaking would contribute to advancements in vehicle designs, advanced restraints and other safety countermeasures. The costs are expected to be minimal since some vehicle manufacturers presently capture additional data beyond Part 563 in their EDRs.

National Highway Traffic Safety Administration

72. **Heavy Vehicle Speed Limiters** Red

Popular Title: Heavy Vehicle Speed Limiters

RIN 2127-AK92

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would respond to petitions from ATA and Roadsafe America to require the installation of speed limiting devices on heavy trucks. In response, NHTSA requested public comment on the subject and received thousands of comments supporting the petitioner's request. Based on the available safety data and the ancillary benefit of reduced fuel consumption, this rulemaking would consider a new Federal Motor Vehicle Safety Standard that would require the installation of speed limiting devices on heavy trucks. We believe this rule will have minimal cost, as all heavy trucks already have these devices installed, although some vehicles do not have the limit set. This rule is expected to decrease the estimated 8991 fatalities caused by crashes involving heavy trucks and buses. It will also increase the fleet fuel efficiency of these vehicles.

Popular Title: Motorcoach Rollover Structural Integrity

RIN 2127-AK96

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would promulgate a new FMVSS for rollover structural integrity requirements for motorcoaches. In August 2007, NHTSA published a motorcoach safety plan identifying four specific priority items: seat belts on motorcoaches, rollover structural integrity, emergency evacuation, and fire safety. The DOT published a comprehensive motorcoach safety action plan in November 2009 that reiterated NHTSA's motorcoach safety priorities. This rulemaking also addresses 6 recommendations issued by the NTSB on motorcoach roof strength and structural integrity.

75.	Electronic Stability Control Systems for Heavy Vehicles	Red
-----	--	-----

Popular Title: Heavy Vehicle ESC

RIN 2127-AK97

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would promulgate a new Federal standard that would require stability control systems on truck tractors and motorcoaches that address both rollover and loss of control crashes, after an extensive research program to evaluate the available technologies, an evaluation of the costs and benefits, and a review of manufacturer's product plans. Rollover and loss of control crashes involving heavy vehicles is a serious safety issue that is responsible for 304 fatalities and 2,738 injuries annually. They are also a major cause of traffic tie-ups, resulting in millions of dollars of lost productivity and excess energy consumption each year. Suppliers and truck and motorcoach manufacturers have developed stability control technology for heavy vehicles to mitigate these types of crashes. Our preliminary estimate produces an effectiveness range of thirty-seven to fifty-six percent

against single-vehicle tractor-trailer rollover crashes and three to fourteen percent against loss of control crashes that result from skidding on the road surface. With these effectiveness estimates, annually, we estimate 29 - 66 lives would be saved, 517 - 979 MAIS 1-5 injuries would be reduced, and 810 - 1,693 crashes that involved property damage only would be eliminated. Additionally, it would save \$10 - \$26 million in property damage and travel delays. Based on the technology unit costs and affected vehicles, we estimate technology costs would be \$55 to 107 million, annually. However, the costs savings from reducing travel delay and property damage would produce net benefits of \$128 - \$372 million.

79.	Prioritization and Allocation Authority Exercised By the Secretary of Transportation Under the Defense Production Act	Red
-----	--	-----

Popular Title: DPA

RIN 2105-AD83

Stage: NPRM

Previous Stage: None

Abstract: This rulemaking would clarify the prioritization and allocation authorities exercised by the Secretary of Transportation under the Defense Production Act (DPA). The DPA is the President's primary authority to ensure timely availability of private sector resources for national defense. In addition to military and energy activities, the definition of "national defense" includes emergency preparedness activities conducted pursuant to Title VI of The Robert T. Stafford Disaster Relief and Emergency Assistance Act and the protection and restoration of critical infrastructure. Under Title I of the DPA, the President has the authority to require the acceptance and prioritization of contracts and orders -- and to allocate materials, services, and facilities -- in support of the national defense. Under Section 201 of Executive Order 12919, the President has delegated these prioritization and allocation authorities to the Secretary of Transportation for all forms of civil transportation. In the 2009 DPA reauthorization legislation, Congress mandated that each Federal agency with delegated authority under Title I of the DPA develop final rules that establish standards and procedures for implementing its delegated authority in emergency and nonemergency conditons. Additionally, Congress mandated that, to the extent practicable, the rules be consistent and unified. DOT is part of an interagency working group, along with the other delegated agencies, that is developing consistent unified rules.

RIN 2105-AE12

Stage: SNPRM/2

Previous Stage: NPRM: Publication Date 06/08/2010; Comment Period End 08/09/2010.

Abstract: This rulemaking is the second of two successive Air Carrier Access Act (ACAA) rulemakings that will fulfill a commitment made in the most recent final rule amending the ACAA rule (2105-AD92). It would seek information from the public on: (1) whether there are safety-related reasons for excluding service animals other than dogs that may be specific to foreign carriers; (2) whether the cost of requiring carriers to supply free in-flight medical oxygen would create an undue burden; and (3) whether providing high-contrast captioning on in-flight entertainment displays is technically and economically feasible. It would also address accessible lavatories on single-aisle aircraft and a rulemaking petition from the Psychiatric Service Dog Society to eliminate provisions allowing carriers to require documentation and 48 hours advance notice for users of psychiatric service animals, and miscellaneous service animal issues. After the public comment period, the Department intends to consolidate its final determinations with respect to the instant rulemaking and another rulemaking addressing accessibility of websites and kiosks into a single final rule amending the ACAA rule. The first rulemaking would be issued under RIN 2105-AD96.

Popular Title: Loading/Unloading

RIN 2137-AE37**Stage:** Final Rule**Previous Stage:** NPRM: Publication Date 03/11/2011; End of Comment Period 05/10/2011.

Abstract: This rulemaking would request information from industry that would consider whether additional requirements governing bulk loading and unloading operations are necessary. PHMSA has reviewed transportation incident data and findings of several National Transportation Safety Board and Chemical Safety Board accident investigations involving bulk hazardous materials loading and unloading operations, which suggest there may be opportunities to enhance the safety of such operations. In particular, PHMSA is examining what, if any, safety benefits would accrue from a requirement for persons conducting bulk loading and unloading operations to develop and implement operating procedures governing these operations.

89. **Pipeline Safety: Enforcement of State Excavation Damage Laws** Red**Popular Title:** Excavation Damage Laws**RIN 2137-AE43****Stage:** NPRM**Previous Stage:** ANPRM: Publication 10/29/2009; End of Comment Period 12/14/2009.

Abstract: The PIPES Act provides PHMSA with the authority to enforce excavation damage laws in those states that have inadequate enforcement. This rulemaking would consider standards for excavators and operators to follow when conducting excavation in a vicinity of a pipeline and the administrative procedures to be used for enforcement proceedings.

90.	Hazardous Materials: Revisions to Requirements for the Transportation of Lithium Batteries	Red
-----	---	-----

Popular Title: Transportation of Lithium Batteries

RIN 2137-AE44

Stage: Final Rule

Previous Stage: NPRM: Publication Date 1/11/2010; End of Comment Period 3/12/2010.

Abstract: This rulemaking would amend the Hazardous Materials Regulations to comprehensively address the safe transportation of lithium cells and batteries. The intent of the rulemaking is to strengthen the current regulatory framework by imposing more effective safeguards, including design testing to address risks related to internal short circuits, and enhanced packaging, hazard communication, and operational measures for various types and sizes of lithium batteries in specific transportation contexts. The rulemaking responds to several recommendations issued by the National Transportation Safety Board.

93.	Pipeline Safety: Control Room Management; Change in Implementation Period	Black
-----	--	-------

Popular Title: Control Room Management

RIN 2137-AE64

Stage: Final Rule

Previous Stage: NPRM: Publication Date 09/17/2010; End of Comment Period 11/16/2010. Extension of Comment Period Publication Date 11/16/2010; End of Extended Comment Period 12/03/2010.

Abstract: PHMSA published the Control Room Management/Human Factors final rule in the Federal Register (74 FR 63310) on December 3, 2009, which became effective on February 1, 2010. The final rule established an 18-month program development deadline of August 1, 2011, and a subsequent 18-month program implementation deadline of February 1, 2013. This rulemaking would expedite the program implementation deadline to August 1, 2011, for most of the requirements, except for certain provisions regarding adequate information and alarm management, which would have a program implementation deadline of August 1, 2012. The final rule's regulatory analysis did not consider specific costs for the program implementation deadlines, because the costs associated with the rule were determined to be the first-year program implementation costs, and were not dependent on the implementation deadline. PHMSA believes that the 18 months provided for program development is sufficient for pipeline operators to both develop and implement certain provisions of the rule. Where PHMSA believes there is a need for additional program implementation time, the rulemaking would moderately shorten that time by only six months. Therefore, PHMSA does not believe there is additional cost for this rulemaking beyond what has already been evaluated in the original control room management final rule.

Pipeline and Hazardous Materials Safety Administration

94. **Hazardous Materials: Limiting the Use of Mobile Telephones by Highway** Red

Popular Title: Use of Mobile Telephones

RIN 2137-AE65

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would limit the use of mobile telephones by drivers during the operation of a motor vehicle containing a quantity of hazardous materials requiring placarding under Part 172 of the 49 CFR or any quantity of a select agent or toxin listed in 42 CFR Part 73. Additionally, in accordance with requirements proposed by the Federal Motor Carrier Safety Administration (FMCSA), motor carriers would be prohibited from requiring or allowing drivers of covered motor vehicles to engage in the use of mobile telephones while driving. This rulemaking would improve health and safety on the Nation's highways by reducing the prevalence of distracted driving-related crashes, fatalities, and injuries involving drivers of commercial motor vehicles.

Abstract: This rulemaking would address effective procedures that hazardous liquid operators can use to improve the protection of High Consequence Areas (HCA) and other vulnerable areas along their hazardous liquid onshore pipelines. PHMSA is considering whether changes are needed to the regulations covering hazardous liquid onshore pipelines, whether other areas should be included as HCAs for integrity management (IM) protections, what the repair timeframes should be for areas outside the HCAs that are assessed as part of the IM program, whether leak detection standards are necessary, valve spacing requirements are needed on new construction or existing pipelines, and PHMSA should extend regulation to certain pipelines currently exempt from regulation. The agency would also address the public safety and environmental aspects any new requirements, as well as the cost implications and regulatory burden.

Pipeline and Hazardous Materials Safety Administration

96. **Hazardous Materials: Transportation of Lithium Batteries** Red

Popular Title: Lithium Batteries II

RIN 2137-AE68

Stage: Undetermined

Previous Stage:None

Abstract: This rulemaking would amend requirements in the Hazardous Materials Regulations (HMR) that apply to cargo shipments of lithium batteries and cells by aircraft (none of the proposed changes would apply to the checked or carry-on baggage of a passenger or crewmember). The revisions would apply to shipments of lithium cells and batteries (but not to lithium batteries packed with or contained in equipment) and would: (1) extend the current prohibition of lithium metal cells and batteries from passenger carrying aircraft to cargo-only aircraft; (2) prohibit the transport of lithium ion cells and batteries as cargo aboard passenger-carrying aircraft; (3) impose a restriction on the location(s) on a cargo-only aircraft where lithium cells and batteries could be transported. One additional change would reduce the aircraft quantity limits for lithium cells and batteries packed with or contained in equipment. An NPRM was scheduled for publication on 4/19/2011.

98.	Pipeline Safety: Excess Flow Valves In Applications Other Than Single-Family Residences in Gas Distribution Systems	Black
-----	--	-------

Popular Title: Excess Flow Valves

RIN 2137-AE71

Stage: ANPRM

Previous Stage:None

Abstract: This rulemaking would require excess flow valves (EFVs) be installed in all new and renewed gas service lines, for structures other than single family dwellings, when the operating conditions are compatible with readily available valves. These changes would be in response to NTSB and PHMSA investigations of current EFV installation practices. The intended effect of the rule is to increase the level of safety for structures other than single family dwellings currently subject to Federal pipeline safety regulation. This rulemaking was recently upgraded to significant.

Research and Innovative Technology Administration

101. **Reporting Ancillary Airline Passenger Revenues** Green

Popular Title: Reporting Ancillary Airline Passenger Revenues

RIN 2139-AA13

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would collect more detailed revenue information regarding airline imposed fees from those air carriers meeting the definition of "large certificated air carriers." Many air carriers have adopted fees for such services as checked baggage, carry-on baggage, meals, on-board entertainment, internet connections, pillows, blankets, early boarding, canceling or changing reservations, unaccompanied minors, pet transportation, etc. The rulemaking would also change the way the Department computes mishandled baggage rates from mishandled baggage reports per domestic enplanement to mishandled bags per checked bags.
