|--|-----|
| 1. Aging Aircraft Program (Widespread Fatigue Damage) | Red |
|--|-----|

Popular Title: Aging Aircraft Widespread Fatigue

RIN 2120-AI05

Stage: Final Rule

Previous Stage: NPRM: Publication Date 4/18/2006; End of Comment Period 7/17/2006; Extended Comment Period 7/17/2006; End of Extended Comment Period 9/18/2006.

Abstract: This rulemaking would require design approval holders to establish limits of validity (LOVs) of the engineering data that support the maintenance programs for certain transport category airplanes, and it would require them to determine if maintenance actions are needed to prevent widespread fatigue damage before an airplane reaches its LOV. This rulemaking would require operators of any affected airplane to incorporate the LOV into the airworthiness limitations section of the instructions for continued airworthiness. This rulemaking would also prohibit operation of an affected airplane beyond the LOV, unless an operator has incorporated an extended LOV and any necessary service information into its maintenance program.

2. **Part 145: Repair Stations--Ratings and Quality System** Red

Popular Title: Part 145

RIN 2120-AI53

Stage: Withdrawal

Previous Stage: NPRM: Publication Date 12/01/2006; End of Comment Period 03/01/2007; Extended Comment Period Publication Date 02/27/2007; End of Extended Comment Period Date 03/01/2007

Abstract: The rulemaking would withdraw a previously published Notice of proposed rulemaking (NPRM). The NPRM proposed to revise the system of ratings and require repair stations to establish a quality program. The NPRM also proposed to require each repair station to maintain a capability list, designate a chief inspector, and have permanent housing for facilities, equipment, materials, and personnel. The proposal would have specified additional instances where the FAA may deny a repair station certificate, and clarified some existing repair station regulations. We are withdrawing the NPRM, because we have determined that it does not adequately address the current repair station environment and because of the significant issues commenters raised.

3. **Commuter Operations in Very Light Jets (VLJs)** Red

Popular Title: VLJ

RIN 2120-AI84

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would establish a rule to allow passenger-carrying commuter operations to be conducted under the provisions of part 135 using multiengine turbojets, certificated under either part 23 or part 25, configured with 9 or fewer passenger seats. The rulemaking would allow multiengine turbojet operators to provide commuter service to the traveling public, thus accommodating new technologies and a new generation of turbojet airplanes that otherwise would not be allowed in part 135 commuter service. Since 1995, turbojets used in scheduled operations must operate under the provisions of part 121. This current rulemaking resulted, in part, from recommendations from the Aviation Rulemaking Committee for parts 14 CFR 135/125 and covers pilot crew, equipment, training, and dispatch requirements for the safe operation of this new generation airplane.

4. **Re-registration and Renewal of Aircraft Registration** Green

Popular Title: Re-registration & Renewal of Aircraft Registration

RIN 2120-AI89

Stage: Final Rule

Previous Stage: NPRM: Publication Date 2/28/2008; End of Comment Period 8/28/2008

Abstract: This rulemaking would amend requirements concerning the registration of aircraft. The rulemaking is based on the need to increase and maintain the accuracy of aircraft registration information in the Civil Aviation Registry. This rulemaking would ensure aircraft owners periodically provide information regarding changes in registration. The rulemaking would respond to the concerns of law enforcement and other government agencies and would provide more accurate, up-to-date aircraft registration information to all users of the Civil Aviation Registry database.

5. **Activation of Ice Protection** Red

Popular Title: Activation of Ice Protection

RIN 2120-AI90

Stage: Final Rule

Previous Stage: NPRM: Publication Date 04/26/2007; End of Comment Period 07/25/2007

Abstract: This rulemaking would amend the airworthiness standards applicable to transport category airplanes certificated for flight in icing conditions. The standards would require a means to ensure timely activation of the airframe ice protection system. This rulemaking is the result of information gathered from a review of icing accidents and incidents, and is intended to improve the level of safety for new airplane designs when operating in icing conditions.

6.	Automatic Dependent Surveillance - Broadcast (ADS-B) Equipage Mandate To Support Air Traffic Control Service	Green
----	---	-------

Popular Title: ADS-B

RIN 2120-AI92

Stage: Final Rule

Previous Stage: NPRM: Publication Date 10/05/2007; End of Comment Period 11/19/07; Comment Period Extended 01/03/2008; End of Extended Comment Period 03/03/2008.

Abstract: This rulemaking would require Automatic Dependent Surveillance - Broadcast (ADS-B) Out equipment on aircraft to operate in certain classes of airspace within the United States National Airspace System. The rulemaking is necessary to accommodate the expected increase in demand for air transportation, as described in the Next Generation Air Transportation System Integrated Plan. The intended effect of this rule is to provide the Federal Aviation Administration with a comprehensive surveillance system that accommodates the anticipated increase in operations and would provide a platform for additional flight applications and services.

7. **Flight Crewmember Duty Limitations and Rest Requirements** Black

Popular Title: Duty Limitations And Rest Requirements

RIN 2120-AI93

Stage: Undetermined

Previous Stage: NPRM: Publication Date 12/20/1995; End of Comment Period 03/19/1996; Comment Period Extended 3/20/1996; End of Extended Comment Period 6/19/1996.

Abstract: This rulemaking would amend the regulations on duty period limitations, flight time limitations, and rest requirements for flight crewmembers engaged in air transportation. The changes would respond to the need to ensure that the rules will continue to provide the minimum level of safety. This rulemaking responds to public and congressional interest in regulating flight crewmember rest requirements, NTSB Safety Recommendations, petitions for rulemaking, and scientific data. This action is considered significant because of substantial public interest. The FAA is considering proposing additional changes in response to comments received on the NPRM.

8. **Qualification, Service, and Use of Crewmembers and Aircraft Dispatchers** Red

Popular Title: Part 121, Subparts N and O

RIN 2120-AJ00

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would amend the regulations for crewmember and dispatcher training programs in domestic, flag, and supplemental operations. The rulemaking would enhance traditional training programs by requiring the use of flight simulation training devices for flight crewmembers and including additional training requirements in areas that are critical to safety. The rulemaking would also reorganize and revise the qualification and training requirements. The changes are intended to contribute significantly to reducing aviation accidents.

9. **Part 121 Pilot Age Limit** Red

Popular Title: Age 65

RIN 2120-AJ01

Stage: Final Rule

Previous Stage:None

Abstract: This rulemaking would correct the language of the Code of Federal Regulations to bring it into conformance with recent legislation raising the upper age limit for pilots serving in domestic, flag, and supplemental operations until they reach their 65th birthday. Congress enacted legislation, effective December 13, 2007, mandating an Age-65 limit for pilots for purposes of Title 49 USC.

Popular Title: Fire Protection III

RIN 2120-AJ04

Stage: Final Rule

Previous Stage: NPRM: Publication Date 02/21/2008; End of Comment Period 05/21/2008

Abstract: This rulemaking would change the fire protection standards for issuing original and amended type certificates for aircraft engines and harmonize Federal Aviation Administration and European Aviation Safety Agency certification standards. Harmonization would lower the cost of airplane engine development, enhance safety, simplify international type certifications, codify current industry practices, and clarify existing requirements.

RIN 2120-AJ06

Stage: Final Rule

Previous Stage: NPRM: Publication Date 03/26/2008; End of Comment Period 06/24/2008

Abstract: This rulemaking would establish a standard for applicants to use when applying for and obtaining approval of a maximum engine overtorque limit. The rule harmonizes FAA and European standards and simplifies airworthiness approvals for the import and export of turbopropeller and turboshaft engines with free power turbines. The intended effect of this action is to improve requirements for maximum engine overtorque limits.

12. **Safety Management Systems (SMS)** Red

Popular Title: SMS

RIN 2120-AJ15

Stage: ANPRM

Previous Stage:None

Abstract: This rulemaking would require a Safety Management System (SMS) for FAA certificate holders, certain product manufacturers, applicants, and employers. This action is being taken to further enhance the practice of managing safety, conducting risk and system assessments and analysis, undertaking preventive and corrective actions, and creating a safety culture. The intended effect of this action would make the United States compliant with International Civil Aviation Organization (ICAO) annexes.

Federal Aviation Administration

13. **Pilot-in-Command Proficiency Check in Single-Piloted Turbojet Airplanes** Red

Popular Title: PIC Proficiency

RIN 2120-AJ18

Stage: NPRM

Previous Stage:None

Abstract: This rule would require proficiency checks for pilots in command (PIC) of single-piloted turbojet powered airplanes, allow pilot schools to use Internet-based training without requiring schools to have a physical ground training facility, allow pilot schools and provisional pilot schools to apply for a combined private pilot certification and instrument rating course, and revise the definitions of "complex airplane" and "high performance airplane." FAA believes these actions are necessary to respond to changes in the aviation industry and to avoid imposing unnecessary regulatory burdens. The intended effect of this rule would be to ensure flight crewmembers have the training and qualifications necessary to operate aircraft safely.

15. **Flightcrew Alerting (Formerly Warning, Caution and Advisory Lights)** Green

Popular Title: Flightcrew Alerting

RIN 2120-AJ35

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would amend the airworthiness standards for transport category airplanes regarding definitions, prioritization, color requirements, and performance. These changes would update the latest technology and functionality concerning flightcrew alerting. This rulemaking is necessary to add additional alerting functions and to consolidate and standardize definitions and regulations for flightcrew warning, caution, and advisory systems.

16.	Restrictions on Operators Employing Former Flight Standards Service Aviation Safety Inspectors	Yellow
-----	---	--------

Popular Title: Post Employment Restrictions

RIN 2120-AJ36

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would prohibit a certificate holder from employing or contracting with a former Aviation Safety Inspector (ASI) or other person with certificate holder oversight responsibilities to act as an agent or to represent that certificate holder in any matter before the FAA. This restriction would apply if the person, in the proceeding two year period, has (a) served as, or was responsible for oversight of, a Flight Standards Service ASI; and (b) had the responsibility to inspect, or oversee the inspection of, the operations of the certificate holder. The rulemaking would enhance the FAA's ability to properly perform its safety mission and to ensure that every passenger can have complete confidence in the integrity of the programs and operations administered by the FAA.

Abstract: This rulemaking would amend the certification procedures and identification requirements for aeronautical products and articles. These amendments would update and standardize those requirements for production approval holders (PAHs), revise export airworthiness approval requirements to facilitate global manufacturing, move all part-marking requirements from part 21 to part 45, and amend the identification requirements for products and articles. The intent of these changes is to continue to promote safety by ensuring that aircraft, and products and articles designed specifically for use in aircraft, wherever manufactured, meet appropriate minimum standards for design and construction. This rulemaking was split from RIN 2120-AI78.

18.	Part 129 Operations Specifications	Green
-----	---	-------

Popular Title: Part 129 Ops Specs

RIN 2120-AJ45

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would clarify and standardize the rules for application, amendment, suspension or revocation of operations specifications issued to foreign air carriers operating in the United States. This action is necessary to update our processes for Operations Specifications. The intent of this action is to permit operations specifications to be easily revised and updated to meet international standards and the changing aviation environment.

19.	Congestion Management Rule for John F. Kennedy International Airport and Newark Liberty International Airport	Green
-----	--	-------

Popular Title: JFK-EWR Congestion Management Recession

RIN 2120-AJ48

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would rescind the final rule on Congestion Management for John F. Kennedy International Airport and Newark Liberty International Airport. The final rule established procedures to address congestion in the New York City area by assigning slots at John F. Kennedy (JFK) and Newark Liberty (Newark) International Airports, assigning to existing operators the majority of slots at the airports, and creating a market by annually auctioning off a limited number of slots in each of the first five years of the rule. The final rule also contained provisions for minimum usage, capping unscheduled operations, and withdrawal for operational need. The rule was scheduled to sunset in ten years.

Abstract: This rulemaking would replace three current identification and registration systems: the US DOT number identification system, the commercial registration system, and the financial responsibility system, with an online Federal unified registration system. This program would serve as a clearinghouse and depository of information on, and identification of, brokers, freight forwarders, and others required to register with the Department of Transportation. The Agency is revising this rulemaking to address amendments directed by SAFETEA-LU. The replacement system for the Single State Registration System, which the ICC Termination Act originally directed be merged under URS, will be addressed separately.

25.	Application by Certain Mexico-Domiciled Motor Carriers to Operate Beyond U.S. Municipalities and Commercial Zones on the U.S.-Mexico Border	Red
-----	--	-----

Popular Title: Mexico-Domiciled Motor Carriers

RIN 2126-AA34

Stage: Undetermined

Previous Stage: NPRM: Publication Date 05/03/2001; End of Comment Period 07/02/2001. Interim Final Rule: Publication Date 03/19/2002; End of Comment Period 04/18/2002.

Abstract: This rulemaking would change FMCSA regulations to govern applications by Mexican carriers to operate beyond municipalities and commercial zones at the United State-Mexico border. It would also revise the application form, OP-1MX, to be filed by these Mexican motor carriers. The revised form would require additional information about the applicant's business and operating practices to allow the FMCSA to determine if the applicant can meet the safety standards established for operating in interstate commerce in the United States. Carriers that had previously submitted an application would have to submit the updated form. These changes are needed to implement part of the North American Free Trade Agreement (NAFTA). On January 16, 2003, the Ninth Circuit Court remanded this rule, along with two other NAFTA-related rules, to the agency, requiring a full environmental impact statement and an analysis required by the Clean Air Act. On June 7, 2004, the Supreme Court reversed the Ninth Circuit and remanded the case, holding that FMCSA is not required to prepare the environmental documents as ruled by the Ninth Circuit. FMCSA is waiting for Interim Final Rule experience after the border opens before deciding what to do next on this rulemaking. FMCSA originally planned to publish a final rule by November 20, 2003. Currently, FMCSA is reviewing the next action regarding new legislation.

26.	Safety Monitoring System and Compliance Initiative for Mexico-Domiciled Motor Carriers Operating in the United States	Red
-----	--	-----

Popular Title: Safety Monitoring

RIN 2126-AA35

Stage: Undetermined

Previous Stage: NPRM: Publication Date 05/03/2001; End of Comment Period 07/02/2001. Interim Final Rule: Publication Date 03/19/2002; End of Comment Period 04/18/2002.

Abstract: This rule would implement a safety monitoring system and compliance initiative designed to evaluate the continuing safety fitness of all Mexico-domiciled carriers within 18 months after receiving a provisional Certificate of Registration or provisional authority to operate in the United States. It also would establish suspension and revocation procedures for provisional Certificates of Registration and operating authority, and incorporate criteria to be used by FMCSA in evaluating whether Mexico-domiciled carriers exercise basic safety management controls. The interim rule included requirements that were not proposed in the NPRM but which are necessary to comply with the FY-2002 DOT Appropriations Act. On January 16, 2003, the Ninth Circuit Court of Appeals remanded this rule, along with two other NAFTA-related rules, to the agency, requiring a full environmental impact statement and an analysis required by the Clean Air Act. On June 7, 2004, the Supreme Court reversed the Ninth Circuit and remanded the case, holding that FMCSA is not required to prepare the environmental documents. FMCSA is waiting for Interim Final Rule experience after the border opens before deciding what to do next on this rulemaking. FMCSA originally planned to publish a final rule by November 28, 2003. Currently, FMCSA is reviewing the next action regarding new legislation.

28.	Limitations on the Issuance of Commercial Driver Licenses with a Hazardous Materials Endorsement	Green
-----	---	-------

Popular Title: USA PATRIOT Act Rule

RIN 2126-AA70

Stage: Interim Final Rule/4

Previous Stage: Interim Final Rule: Publication Date 05/05/2003; End of Comment Period 07/07/2003. IFR Delay of Compliance Date: Publication Date 11/07/2003; End of Comment Period 01/06/2004. IFR Delay of Compliance Date: Publication Date 08/19/2004; Interim Final Rule/3: Publication Date 08/19/2004.

Abstract: This rulemaking would prohibit States from issuing, renewing, transferring or upgrading a commercial driver's license (CDL) with a hazardous materials endorsement, unless the Transportation Security Administration (TSA) has first conducted a background check on the applicant and determined the applicant does not pose a security risk warranting denial of the hazardous materials endorsement. FMCSA and TSA simultaneously published interim final rules. FMCSA has published another IFR corresponding to TSA's extension of compliance date. Since this rulemaking conforms to TSA's rulemaking, the rulemaking is dependent upon TSA action. This action is considered significant because of substantial public and congressional interest, and national security.

30. **Electronic On-Board Recorders for Hours-of-Service Compliance** Red

Popular Title: Electronic On-Board Recorders

RIN 2126-AA89

Stage: Final Rule

Previous Stage: ANPRM: Publication Date 9/01/2004; End of Comment Period 11/30/2004. NPRM: Publication Date 01/18/2007; End of Comment Period 04/18/2007.

Abstract: This rulemaking would amend the Federal Motor Carrier Safety Regulations (FMCSRs) to incorporate new performance standards for electronic on-board recorders (EOBRs) installed in commercial motor vehicles (CMVs) manufactured 2 years after the effective date of a final rule. On-board hours-of-service recording devices meeting FMCSA's current requirements and voluntarily installed in CMVs manufactured before that date could continue to be used for the remainder of the service life of those CMVs. Motor carriers that have demonstrated a history of serious noncompliance with the hours-of-service (HOS) rules would be subject to mandatory installation of EOBRs meeting the new performance standards (a remedial directive). The motor carrier would then be required to install EOBRs in all of its CMVs regardless of their date of manufacture and to use the devices for HOS recordkeeping for a period of 2 years, unless the carrier already had equipped its vehicles with automatic on-board recording devices (AOBRDs) meeting the Agency's current requirements under 49 CFR 395.15 and could demonstrate to FMCSA that its drivers understand how to use the devices. FMCSA would encourage industry-wide use of EOBRs by providing the following incentives for motor carriers to voluntarily use EOBRs in their CMVs: Revising the Agency's compliance review procedures to permit examination of a random sample of drivers' records of duty status; and providing partial relief from HOS supporting documents requirements, if certain conditions are satisfied.

Stage: Final Rule

Previous Stage: NPRM: Publication Date 4/9/2008 ;End of Comment Period 6/9/2008; End of Extended Comment Period 7/9/2008.

Abstract: This rulemaking would establish revisions to the commercial driver's license knowledge and skills testing standards as required by section 4019 of TEA-21, implement fraud detection and prevention initiatives at the State driver licensing agencies as required by the SAFE Port Act of 2006, and establish new minimum Federal standards for States to issue commercial learner's permits (CLPs), based in part on the requirements of section 4122 of SAFETEA-LU. In addition, to ensuring the applicant has the appropriate knowledge and skills to operate a commercial motor vehicle, this rule would establish the minimum information that must be on the CLP document and the electronic driver's record. The rule would also establish maximum issuance and renewal periods, establish a minimum age limit, address issues related to a driver's State of Domicile, and incorporate previous regulatory guidance into the Federal regulations. This rule would also address issues raised in the SAFE Port Act.

Federal Motor Carrier Safety Administration

36. **Minimum Training Requirements for Entry Level Commercial Motor Vehicle Operations** Green

Popular Title: Entry Level Driver Training

RIN 2126-AB06

Stage: Final Rule

Previous Stage: NPRM: Publication Date 12/26/2007; End of Comment Period 3/28/2008; Publication Date for Extension of Comment Period 3/21/2008; End of Extended Comment Period 5/23/2008. Undetermined: Publication Approved ;Publication Date ;End of Comment Period .

Abstract: This rulemaking would require behind-the-wheel and classroom training for persons who must hold a commercial driver's license to operate commercial motor vehicles. This action is in response to the U.S. Court of Appeals for the District of Columbia Circuit's December 2005 decision remanding the May 21, 2004, Final Rule, "Minimum Training Requirements for Entry-Level Commercial Motor Vehicle Operators" to the Agency for further consideration. The rulemaking will consider the effectiveness of CMV driver training in reducing crashes, the appropriate types and levels of training that should be mandated, and related costs.

37. **Carrier Safety Fitness Determination** Red

Popular Title: CSA 2010 Carrier Safety Fitness Determination

RIN 2126-AB11

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would revise 49 CFR Part 385, Safety Fitness Procedures, in accordance with the Agency's major new initiative, Comprehensive Safety Analysis (CSA) 2010. CSA 2010 is a new operational model FMCSA plans to implement that is designed to help the Agency carry out its compliance and enforcement programs more efficiently and effectively. Currently, the safety fitness rating of a motor carrier is determined based on the results of a very labor intensive compliance review conducted at the carrier's place of business. Aside from roadside inspections and new audits, the compliance review is the Agency's primary intervention. Under CSA 2010, FMCSA would propose to implement a broader array of progressive interventions, some of which allow FMCSA to make contact with more carriers. Through this rulemaking FMCSA would establish safety fitness determinations based on safety data consisting of crashes, inspections, and violation history rather than the standard compliance review. This will enable the Agency to assess the safety performance of a greater segment of the motor carrier industry with the goal of further reducing large truck and bus crashes and fatalities.

-----	--	-------

Popular Title: Roadway Worker Protection; Adjacent-Track On-Track

RIN 2130-AB96

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would simplify the determination regarding whether or not adjacent track protection is required for roadway work groups engaged in large-scale maintenance or construction, pursuant to 49 CFR Part 214. The recent increase in roadway worker fatalities that have occurred on adjacent track has caused some concern at FRA and throughout the industry, even prompting the filing of a petition for emergency order. FRA issued a notice of safety advisory to address the issue in May of 2004; however, it appears that the effects were not long-lasting. This rulemaking is based on the consensus language developed through the Roadway Worker Protection (RWP) Working Group of FRA's Railroad Safety Advisory Committee (RSAC).

Federal Transit Administration

43.	Contractor Performance Assessment for Capital Investment Program	Black
-----	---	-------

Popular Title: Contractor Performance

RIN 2132-AA96

Stage: Withdrawal

Previous Stage:None

Abstract: On August 10, 2005, the President signed the Safe, Accountable, Flexible, and Efficient Transportation Equity Act-A Legacy for Users (SAFETEA-LU). Section 3011 of SAFETEA-LU made a number of changes to 49 U.S.C. 5309 ("Section 5309"), which authorizes the Federal Transit Administration's (FTA's) capital investment grant program. SAFETEA-LU emphasized the need to improve the accuracy of the estimates of ridership and costs used to support the selection of a major capital investment ("New Start") as a locally preferred alternative (LPA) for Section 5309 funds. Federal transit law supports the use of incentives to encourage the development of more reliable cost and ridership estimates for New Starts funded under Section 5309. A number of provisions in Section 5309 recognize that contractors to grant recipients play an important role in increasing the reliability of forecasting methods to estimate costs and utilization of New Starts projects. This rulemaking would establish a new part 612 in the Code of Federal Regulations. It would encourage accurate cost and ridership estimates through the award of additional New Starts funds to project sponsors, which they can choose to pass along to their contractors. FTA is considering the effect of recently-enacted statutory language concerning the issuance of final rules under 49 U.S.C. 5309 on this rulemaking.

SNPRM: Publication Date 1/30/08; End of Comment Period 3/17/08; Extension of Comment Period 3/14/08; End of Extended Comment Period 3/27/08.

Abstract: This rulemaking would upgrade vehicle roof crush requirements. It is part of the agency's comprehensive response to mitigate the number of fatalities and injuries resulting from vehicle rollovers. Rollover crashes constitute about 3 percent of passenger vehicle crashes, but about one third (10,000) of the occupant fatalities. Light trucks are more prone to rollover, and they represent about half of the U.S. fleet. This rulemaking is significant because of public interest in vehicle safety.

49. **Ejection Mitigation** Red

Popular Title: Ejection Mitigation

RIN 2127-AK23

Stage: NPRM

Previous Stage:None

Abstract: This rulemaking would create a new Federal Motor Vehicle Safety Standard (FMVSS) for reducing occupant ejection. Currently, there are over 52,000 annual ejections in motor vehicle crashes, and over 10,000 ejected fatalities per year. This rulemaking would propose new requirements for reducing occupant ejection through passenger vehicle side windows. The requirement would be an occupant containment requirement on the amount of allowable excursion through passenger vehicle side windows. The SAFETEA-LU legislation requires that: "[t]he Secretary shall also initiate a rulemaking proceeding to establish performance standards to reduce complete and partial ejections of vehicle occupants from outboard seating positions. In formulating the standards the Secretary shall consider various ejection mitigation systems. The Secretary shall issue a final rule under this paragraph no later than October 1, 2009."

Stage: Undetermined

Previous Stage: Interim Final Rule: Publication Date 05/18/2004; End of Comment Period 07/19/2004.

Abstract: This rulemaking would publish a Final Rule addressing the May 2004 Interim Final Rule and respond to any comments. As of January 31, 2007, this rulemaking is on hold pending the receipt of additional information from DHS. The schedule cannot be further updated until this information is received.

55. **Enhancing Airline Passenger Protections**

Red

Popular Title: Aviation Consumer**RIN 2105-AD72****Stage:** NPRM**Previous Stage:** ANPRM: Publication Date 11/22/2007; End of Comment Period 1/22/2008; Clarification Concerning 3/05/2008.

Abstract: This rulemaking would propose to enhance airline passenger protections in the following ways: (1) require carriers to adopt contingency plans for lengthy tarmac delays and to incorporate these plans in their contracts of carriage, (2) require carriers to respond to consumer problems, (3) declare the operation of flights that remain chronically delayed to be an unfair and deceptive practice and an unfair method of competition, (4) require carriers to publish delay data on their websites, and (5) require carriers to adopt customer service plans, incorporate these in their contracts of carriage, and audit their adherence to their plans.

Popular Title: Packaging Requirements

RIN 2137-AD89

Stage: Final Rule

Previous Stage: NPRM: Publication Date 08/31/2006; End of Comment Period 11/30/2006.

Abstract: This rulemaking would add provisions for Large Packagings and revise the specification requirements for non-bulk packagings and portable tanks. This rulemaking would address issues raised through enforcement actions and requests for clarification of the regulations by packaging manufacturers, third-part labs, and shippers. Also, this action would address packaging closure design modifications that may or may not require recertification.

57.	Hazardous Materials: Requirements for Storage of Explosives During Transportation	Black
-----	--	-------

Popular Title: Storage of Explosives

RIN 2137-AE06

Stage: Undetermined

Previous Stage: ANPRM: Publication Date 11/16/2005; End of Comment Period 02/14/2006; Reopening of Comment Period 7/03/2008; End of Reopened Comment Period 10/01/2008.

Abstract: This rulemaking would address the current safety and security risks associated with the storage of explosives during transportation. The HMR require shipments stored during transportation to conform to the same requirements that apply when the shipments are actually moving and for the shipping company to have security plans covering its shipments. Otherwise, the HMR do not include specific requirements for facilities at which explosives or other high-hazard materials are stored during transportation. The HMR do not establish specific standards for storage facilities nor do they limit the amount of material that may be stored in a single location. Through this rulemaking, the agency will evaluate the adequacy of existing regulatory requirements and the need for additional, more specific requirements. In particular, the agency is considering whether current industry standards applicable to the storage of explosives should be incorporated by reference into the HMR.

60. **Hazardous Materials: Revision of Requirements for Security Plans** Green

Popular Title: Security Plans

RIN 2137-AE22

Stage: Final Rule

Previous Stage: NPRM: Publication Date 9/8/2008; End of Comment Period 11/10/2008.

Abstract: In response to two industry petitions for rulemaking, this rulemaking will reconsider and refine the list of hazardous materials for which security plans are currently required. The industry petitioners asked PHMSA to amend the security plan regulations to create a distinction between hazardous materials that present a significant security risk while in transportation and the vast majority of hazardous materials that pose no significant security risk in transportation.

61. **Control Room Management/Human Factors** Green

Popular Title: Control Room Management/Human Factors

RIN 2137-AE28

Stage: Final Rule

Previous Stage: NPRM: Publication Date 09/12/2008;End of Comment Period 11/12/2008

Abstract: This rulemaking would require operators of natural gas pipelines, hazardous liquid pipelines, and liquefied natural gas (LNG) facilities, to identify and employ specific procedures to improve control room operations, controller training, and controller qualifications. It would require operators to develop, implement, and submit to PHMSA (or the appropriate State), a human factors management plan designed to reduce risks associated with human factors. This would require operators to include in their plans a maximum limit on the hours of service for individuals employed as controllers. It would also require operators to periodically review their management of computer-based control system alarms and to verify that the control systems provide accurate and timely information to controllers. This rulemaking would further require each operator to validate the implementation of the program elements applicable to their individual control system.

62.	Hazardous Materials; Combination Packages Containing Liquids Intended for Transport by Aircraft	Green
-----	--	-------

Popular Title: Air Packaging

RIN 2137-AE32

Stage: NPRM

Previous Stage: ANPRM: Publication 7/07/2008; End of Comment Period 9/5/2008.

Abstract: Incident data and testing conducted on behalf of DOT indicate many combination packagings authorized for the transportation of hazardous materials may not withstand conditions normally incident to air transportation. PHMSA is considering measures to reduce the incidence of package failures and to minimize the consequences of failures should they occur. This rulemaking would require additional measures to verify packaging integrity, such as performance testing, and revisions to packaging requirements, such as the addition of liners or absorbent material.

63. **Hazardous Materials: Registration and Fee Assessment Program** Green

Popular Title: Registration and Fee Program

RIN 2137-AE35

Stage: Withdrawal

Previous Stage: NPRM: Publication Date 05/05/2008; End of Comment Period 07/14/2008.

Abstract: This rulemaking would amend the statutorily mandated registration and fee assessment program for persons who transport or offer for transportation certain categories and quantities of hazardous materials. For those registrants not qualifying as a small business or not-for-profit organization, PHMSA would increase the fee from \$975 (plus a \$25 administrative fee) to \$2,475 (plus a \$25 administrative fee) for registration year 2009-2010 and following years. For small businesses, the registration fee would remain at its current level of \$975 (plus a \$25 administrative fee). The increase is necessary to fund the national Hazardous Material Emergency Preparedness (HMEP) grants program at its authorized level of \$28,000,000. The purpose of the HMEP grants program is to support hazardous material emergency response planning and training activities by States, local governments, and Indian tribes and related activities in accordance with U.S.C. 5108(b) and 5116.

Pipeline and Hazardous Materials Safety Administration

64. **Hazardous Materials: Bulk Loading and Unloading Operations** Green

Popular Title: Loading/Unloading

RIN 2137-AE37

Stage: ANPRM

Previous Stage:None

Abstract: This rulemaking would request information from industry that would consider whether additional requirements governing bulk loading and unloading operations are necessary. PHMSA has reviewed transportation incident data and findings of several National Transportation Safety Board and Chemical Safety Board accident investigations involving bulk hazardous materials loading and unloading operations, which suggest there may be opportunities to enhance the safety of such operations. In particular, PHMSA is examining what, if any, safety benefits would accrue from a requirement for persons conducting bulk loading and unloading operations to develop and implement operating procedures governing these operations.

65. **Hazardous Materials: Revisions to Requirements for the Transportation of Lithium Batteries** Green

Popular Title: Transportation of Lithium Batteries

RIN 2137-AE44

Stage: NPRM

Previous Stage: .

Abstract: This rulemaking would amend the Hazardous Materials Regulations to comprehensively address the safe transportation of lithium cells and batteries. The intent of the rulemaking is to strengthen the current regulatory framework by imposing more effective safeguards, including design testing to address risks related to internal short circuits, and enhanced packaging, hazard communication, and operational measures for various types and sizes of lithium batteries in specific transportation contexts. The rulemaking responds to several recommendations issued by the National Transportation Safety Board.
